

7 things we can do to stop “smart meters”

westmarinalert.com

- **Call Nav, 916-386-5204**, PG&E’s smart meter representative, and tell her that you don’t want a smart meter installed. They have been telling people that they have no choice, but don’t let them bully you into believing this. Demand that she put you on the list of people who will not get smart meters on the first time around.

- **Download a “DO NOT INSTALL SMART METER HERE!” sign** and post it on to your meter – otherwise you’ll get one soon! <http://westmarinalert.com/resources/> Find other useful resources at www.turn.org.

- **Write the California Public Utilities Commission (CPUC), 505 Van Ness Ave. San Francisco, CA 94102, or call them at 866-849-8390.** Tell them that you oppose the installation of smart meters on your home or business, and insist that they enforce the “opt-out” option.

- **Call State Senator Dean Florez at (916) 651-4016** to support his efforts to create tougher testing standards for smart meters through Senate bill 837, and urge him to include health issues and to work for a permanent moratorium.

- **Call our state senator Mark Leno at (916) 651-4003** to thank him for supporting the efforts of Dean Florez and urge him also to include health issues [and](#) to support a permanent moratorium.

- **Sign an opt-out letter to the CPUC on-line** by going to the emfsafetynetwork.org and read their excellent page: Are Smart Meters Smart?

- **Pass a resolution** through your local government calling for a permanent moratorium on the installation of smart meters. Join other localities in out-smarting “smart” meters – Marin, Sonoma, San Francisco, and Santa Cruz Counties, Sebastopol, Fairfax, Bolinas, Bakersfield, etc., by establishing “smart meter” free zones!
